

Bouffant Cap Machine

This automatic machinery is specialized in producing bouffant cap, the productivity is up to 60pcs /min, suitable for hospitals and other no dust working environment. The processing is fully automated.

Machine data:

Machine name: Automatic Bouffant Cap Machine

Model: HT-NC10

Voltage: AC220V

Power: 4500W

Speed: 40-60pcs/min

Size: 3600*1300*1600MM

Features and Functions:

- 1.Compact Machine Design,so they will save space ;
- 2.All the structure of the whole machine was made from aluminum alloy, beautiful, strong and rustproof;
- 3.With high stability, low failure rate;
- 4.PLC Procedure Control.
